

STATEMENT CLAIMING SMALL ENTITY STATUS
(37 CFR 1.9(f) & 1.27(b))--INDEPENDENT INVENTOR

Docket Number (Optional)

99270

Applicant, Patentee, or Identifier: Masson

Application or Patent No.: _____

Filed or Issued: _____

Title: Electronic Kit Bag

As a below named inventor, I hereby state that I qualify as an independent inventor as defined in 37 CFR 1.9(c) for purposes of paying reduced fees to the Patent and Trademark Office described in:

- ☒ the specification filed herewith with title as listed above.
☐ the application identified above.
☐ the patent identified above.

I have not assigned, granted, conveyed, or licensed, and am under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person who would not qualify as an independent inventor under 37 CFR 1.9(c) if that person had made the invention, or to any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e).

Each person, concern, or organization to which I have assigned, granted, conveyed, or licensed or am under an obligation under contract or law to assign, grant, convey, or license any rights in the invention is listed below:

- ☒ No such person, concern, or organization exists.
☐ Each such person, concern, or organization is listed below.

Separate statements are required from each named person, concern, or organization having rights to the invention stating their status as small entities. (37 CFR 1.27)

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in loss of entitlement to small entity status prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. (37 CFR 1.28(b))

Computerized, electronic pilot "kit bag"

ABSTRACT

The Electronic Kit Bag (EKB) is a computerized, portable pilot "kit bag" that accepts input data, manipulates said data, and outputs solutions.

The EKB consists of standard and state-of-the-art computer parts and peripherals, interfaced for maximum utility. The central operating program of the device assesses the relationships of input data through a logic based, three-dimensional decision-making algorithm. Data output is utilized either directly by the user, by the user through an aircraft system, or directly from the EKB to an aircraft system or autopilot.
